

BOOMINATHAN M

MERN STACK DEVELOPER

+91 7639 189 075 | boominathan7618@gmail.com | linkedin.com/in/boomi-m07 | github.com/boominathan07

PROFESSIONAL SUMMARY

Passionate MERN Stack Developer skilled in React.js, Node.js, Express.js, MongoDB, and JavaScript (ES6+), with hands-on experience in building scalable web applications and integrating RESTful APIs. Proficient in developing responsive, user-friendly interfaces and efficient backend solutions, with a strong focus on debugging, performance optimization, and clean code practices. Eager to contribute to the development of innovative web applications and SaaS products using modern technologies.

TECHNICAL SKILLS

Languages	C, Java
Frontend	React.js, HTML5, CSS3, TailwindCSS, JavaScript (ES6+)
Backend	Node.js, Express.js
Database	MongoDB
APIs	RESTful APIs
Tools	Git, GitHub
AI Tools	Claude Code, Stitch

PROJECTS

LandLink — Land Plot Management & Broker Network Micro-SaaS Platform

- Built a scalable full-stack micro-SaaS platform for land plot management enabling real-time collaboration between land owners and brokers with role-based access control.
- Developed an automated OCR pipeline using OpenCV and PaddleOCR to extract structured plot data from uploaded layout images.
- Implemented a real-time system using Socket.io to handle booking, approval, and status tracking of plots with instant updates.
- Designed secure backend architecture with JWT authentication and modular API design for reliable and maintainable system flow.

Tech Stack: React.js, Node.js, Express.js, MongoDB, Socket.io, OpenCV, PaddleOCR, JWT, Cloudinary

LinkSphere — Link Sharing & Analytics Micro-SaaS Platform

- Built a scalable analytics system for creators to track real-time user behavior in a link-in-bio platform including geo-location, device type, browser, and OS tracking for audience insights.
- Developed an event tracking system using Node.js and MongoDB to capture, process, and aggregate click analytics for performance monitoring and insights generation.
- Implemented secure authentication system using JWT and Google OAuth with role-based access control for managing user sessions and platform access.

Tech Stack: JavaScript, React.js, Node.js, Express.js, MongoDB, JWT, REST APIs

INTERNSHIPS

Evalbench — Web Development & Data Privacy Intern

Dec 2025 – Jan 2026

- Built full-stack web application modules with REST API integration and backend connectivity for seamless client-server communication.
- Implemented data privacy and security practices ensuring safe handling of user and application data.
- Contributed to backend logic development and improved application reliability through structured coding practices.

Evalbench — Web Development Intern

June 2025 – July 2025

- Developed a Spotify-inspired frontend application using React.js, JavaScript, and Tailwind CSS to understand UI development and component-based architecture.
- Worked on company-assigned frontend modules by converting UI designs into responsive and reusable components.
- Integrated REST APIs into frontend applications and improved performance through debugging and optimization techniques.

EDUCATION

B.Tech — Information Technology

Sept 2023 – 2027

Francis Xavier Engineering College, Tirunelveli

CGPA: 8.3

HSC — Class XII

2022 – 2023

Mother Theresa Matric Hr. Sec. School, Kayathar

77.8%

ACHIEVEMENTS

- **First Prize** — Outstanding Problem Solving Skills, ITCAINS Association Inauguration, Department of Information Technology.
